ANDREW SIMON

Computer Science Graduate | Software, Data & IT Support

Cottam, ON · 226-344-2958 · andrewsimon2918@gmail.com · LinkedIn · GitHub · Portfolio

SUMMARY

Honours Computer Science graduate with the Google IT Support Certificate, focused on keeping systems running and catching errors before they become problems. Computer user since age 3, with hands-on experience maintaining a server and several workstations. Built a C++ client-server application that monitors screens live across a network. Brings strong attention to detail from healthcare, where a single incorrect entry can get an insurance claim denied, and explains technical issues clearly to non-technical users.

TECHNICAL SKILLS

- **Programming & Scripting:** Python, C++, C#, Java, JavaScript, HTML, CSS
- **Data:** SQL (MySQL, SQL Server), Power BI, JSON, REST APIs, data entry and validation
- **Systems & Networking:** Networking fundamentals, TCP socket programming, client-server architecture, Linux, command line, system security, hardware and software troubleshooting
- **Tools:** Git and GitHub, Visual Studio, CMake, Android Studio, Unity, Blender, Azure DevOps (Agile)
- **Languages:** English (fluent), French (intermediate)

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science, Applied Computing (Honours), University of Windsor — Oct 2020 – Oct 2024

- Focus areas: software development, networking, and systems design
- Volunteer, Walksafe Program (2021–2022): provided evening safety escorts for students

Google IT Support Professional Certificate, Coursera — May 2022

- Covered troubleshooting, computer networking, operating systems, Linux and the command line, system administration, and IT security

EXPERIENCE

Pharmacy Assistant, Leamington Wellness Pharmacy — Oct 2025 – Present

- Enter and verify prescription and patient data in the pharmacy management system, where errors directly affect patient safety
- Process electronic insurance claims, checking patient and coverage details for accuracy and resolving rejections
- Track and manage medication inventory to keep dispensing accurate
- Handle confidential health records in line with privacy requirements

AI Writing Evaluator, Outlier — May 2024 – Jul 2024

- Evaluated AI-generated writing for accuracy and clarity against detailed quality guidelines
- Wrote structured feedback used to refine model behaviour and improve output quality

IT Support Co-op, SX Communications — Jan 2020 – Apr 2020

- Maintained the company's computer systems, including a server and several workstations
- Installed and configured Windows on newly assembled computers, then tested each setup to confirm the hardware and software worked
- Diagnosed and fixed hardware and software issues, and assisted with communication systems for local businesses
- Placement ended early due to the COVID-19 shutdown

PROJECTS

Student Sync: Networked Screen-Monitoring App *(C++, Win32, TCP sockets, FFmpeg, CMake)* Oct 2023 – Feb 2024

- Co-developed a client-server Windows application that lets educators view live streams of students' screens (final-year university project, two-person team)
- Built client-server communication over TCP sockets and helped design the application's message protocol
- Added multi-monitor screen capture and client GUI components, including the connection dialog and a scrolling log view
- Integrated the FFmpeg library into the CMake build for H.264 video encoding and decoding

Sales Dashboard *(Power BI, Excel)* Oct 2026

- Built an interactive Power BI report on Microsoft's Financial Sample data, with a date table, a year/month slicer, and visuals for profit by month, profit by country, and sales vs. profit by segment

Bookstore Database Application *(C#, WPF, SQL Server, Azure DevOps)* Oct 2023 – Nov 2023

- Worked on an Agile team in Azure DevOps to build a bookstore ordering app backed by a SQL Server database
- Connected the application to the correct database in Azure with a teammate, tested the login, catalogue and ordering features, and delivered the final presentation

CyberChess 2077 *(C#, Unity, Blender)* Sep 2022 – Dec 2022

- Co-developed a turn-based tactics game on a five-person university team
- Co-created the tile-based map system and the Dijkstra pathfinding that moves units across terrain
- Built the character description screen, composed the game's music, and modelled some of the 3D assets

Android Publishing App *(Java, Android Studio, REST API)* Mar 2024

- Set up the Android project, login screen, and navigation for a three-person course project, and prepared the WordPress REST API integration for publishing posts

Portfolio Website and TideWall 3D *(JavaScript, HTML, CSS, C#, Unity, Python)* Mar 2025 – Present

- Built and deployed an accessible personal website on GitHub Pages (WCAG AAA contrast, keyboard and screen-reader support) with a 3D model gallery and browser games
- Developing a co-op 3D game in Unity with split-screen and online multiplayer over a custom networking layer, a save system, and automated tests

ADDITIONAL EXPERIENCE

Automotive Service, Canadian Tire Jun 2022 – Aug 2022

- Assisted customers with parts selection and troubleshooting, and maintained inventory accuracy

Produce Worker, Josh's No Frills Aug 2018 – Dec 2021

- Maintained stock levels and produce quality; recognized in a local community contest
